

Press Release

Dr. Bram Bout joins Bioceros accompanied by a restructuring of the management structure.

Utrecht, The Netherlands, July 2, 2007: Bioceros B.V., a privately held biopharmaceutical research and development contract organization, announced today that Dr. Bram Bout will join the company from July 1st, 2007 as Chief Executive Officer. Remco Brandt, Managing director of Bioceros commented: "I am excited that Mr. Bout is willing to take over the position of CEO. With his expertise and network Bioceros can offer now a full pre-clinical package to customers, including molecular biology, serum-free cell line generation, production at 20L scale and product testing. This also allows Bioceros to develop its own product portfolio. In connection with the above mentioned, the management board of Bioceros B.V. has been restructured reflecting the new corporate structure and identity. The new executive board will comprise out of Dr. Bout as CEO, Mr. Brandt as Chief Operating Officer and Dr. Boon as Chief Scientific Officer.

Prof. dr. Mark de Boer, Chairman of the Supervisory board, added: "With Mr. Bout joining the team a major step has been taken towards a more balanced company. On one hand the CRO activities will generate revenues and on the other hand the company will create its own platform & portfolio."
